

# Bug ID: 1

Bug tag: link bug

**Description:** 进行 UI 测试的时候，在登录页面上点击主页的链接时，会出现一个错误页面，不能到达主页，错误如下

"/LibraryAssistant" 应用程序中的服务器错误。

**Organization:** testers

**Severity:** very serious

**Priority:** High

**Assigned to:** xxj

**Steps to reproduce:**

- 1、 find the code of current tested page in our code resource
- 2、 find the code which generates the link of index page
- 3、 check the file related to the link, then correct the error

**Status:** fixed and closed

## Bug ID: 2

**Bug tag:** data member bug

**Description:** 在编写单元测试代码时,发现之前项目中的一些类的私有成员变量没有为它们设计相应的属性,这导致在单元测试中几乎无法进行编码

**Organization:** testers

**Severity:** need to be solved as soon as possible

**Priority:** med

**Assigned to:** yanghaichuan

**Steps to reproduce:**

find the code of FillTable.cs, AssistantHandler.cs, NewsHandler.cs, then add the needed data member

**Status:** fixed and closed

## Bug ID: 3

**Bug tag:** sql connection bug

**Description:** 在进行有关数据库操作的测试时,发现数据库不能正常连接

**Organization:** testers

**Severity:** very serious(if not corrected,the application can

not run)

**Priority:** High

**Assigned to:** yanghaichuan

**Steps to reproduce:**

1、 find the reason of this error,when we check the file NewsHandler.cs and assistantHandlers.cs, we find thatNewsHandler.cs , AssistantHandler.cs 中的 DataClassesDataContext 类型成员构造时使用了没有参数的构造函数，这会用到原来网站中 web.config 的配置参数，而在测试项目中没有相关配置，更改 DataClassesDataContext 类型成员的赋值语句，直接代入连接字符串：

2、NewsHandler.cs:

```
private static DataClassesDataContext  
dataClassesDataContext = new  
DataClassesDataContext("DataSource=FIREFLY-PC;Initial  
Catalog=LASDB;Integrated Security=True");
```

AssistantHandler.cs:

```
private static DataClassesDataContext db=new  
DataClassesDataContext("Data Source=FIREFLY-PC;Initial  
Catalog=LASDB;Integrated Security=True");
```

**Status:** fixed and closed

# Bug ID: 4

**Bug tag:** delete assistant bug

**Description:** when delete the information of chenbing and chenbing1, the information still remained there, following table shows the bug

111	陈兵	删除
222	陈兵1	删除
admin	管理员	删除
Altair	李星懿	删除
cb	陈兵	删除
lt	李涛	删除
sp	苏平	删除
xxj	谢晓境	删除
yhc	杨海川	删除

**Organization:** testers

**Severity:** serious

**Priority:** med

**Assigned to:** litao

**Steps to reproduce:**

- 1、 find the code which handlers the table of assistants information
- 2、 check how it deletes assistants' information,and find out whether it deletes assistants' information in a right way
- 3、 if it's not the right way,correct it.if it is right,find other possible reasons.

**Status:** fixed and closed
